

San diego invests in independent energy storage

Does SDG&E have a battery & microgrid portfolio?

SDG&E has been rapidly expanding its battery energy storage and microgrid portfolio. We have around 21 BESS and microgrid sites with 442 megawatts (MW) of utility-owned energy storage and another 40+MW in development.

How much battery storage does SDG&E have?

SDG&E's utility-owned battery storage portfolio is expected to reach nearly 480 MW of power capacity and over 1.9 GWh of energy storage by year-end, including the Westside Canal expansion and two additional projects in San Diego County currently being constructed.

What are energy storage projects?

Energy storage projects support grid reliability and the integration of more clean energy into the electric grid. Enables the California Independent System Operator (CAISO) to dispatch energy from our batteries at any time to help balance supply and demand on the statewide grid.

How big is San Diego's battery storage capacity?

Within the past five years, the state has grown its battery storage capacity by more than 15 times, up from just 770 MW in 2019. The project will help support the Marine Corps' largest West Coast expeditionary training facility, which encompasses more than 125,000 acres in San Diego County.

Is SDG&E a good company?

SDG&E is a recognized leader in its industry and community, as demonstrated by being named Corporate Partner of the Year at the San Diego Business Journal's Nonprofit & Corporate Citizenship Awards and receiving PA Consulting's ReliabilityOne Award for Outstanding Reliability Performance for 18 consecutive years.

Why do we need battery storage projects at Camp Pendleton?

Battery storage projects like this one at Camp Pendleton are vital to building a reliable and resilient electric grid in the face of climate extremes. Governor Gavin Newsom

SAN DIEGO, July 6, 2023 - As part of its commitment to help bolster summer grid reliability and advance California's 100% clean energy goal, San Diego Gas & ...
