

Sgs certification agency for energy storage equipment

What is SGS certification?

SGS provides certification services to companies wishing to ensure that their processes, products, services, or systems comply with national and international standards and regulations. ISO 9001 is an internationally-recognized quality management system (QMS) standard that ensures services and products are in line with the requirements.

What services does SGS offer?

With unrivaled experience we can provide all the required technical verifications, safety settings and factory auditing services. Contact SGS to find out how our battery testing services can help get your products to market faster.

What is SGS battery testing?

SGS battery testing services can identify your target market regulations for cells, batteries and modules to ensure compliance with contractual or regulatory requirements. SGS battery testing services can identify your target market regulations for cells, batteries and modules to ensure compliance with contractual or regulatory requirements.

Why should you choose SGS?

The customer benefits from the laboratory's ISO 17025 accreditation as well as from its long-standing practical experience with lithium ion batteries. Whether cells, protection circuits, battery-management systems, modules or battery packs, SGS tests to the OEM's specifications and established standards.

How can SGS help you grow your business?

Transform your business and enable sustainable growth by enhancing knowledge, skills and processes with certification, supplier audits, sustainability assessments, consulting and training from SGS. Find out more.
