

Solar battery installation perth

Are solar batteries being installed in Perth?

Solar batteries in Perth are being installed at a record pace as the transition to renewable energy continues. At Positive Energy over one in three of our new customers are installing a solar battery when they buy their new solar panel system. Also many customers with existing solar systems are making the transition away from relying on Synergy.

Why should you use a solar battery in Perth?

Having a solar battery helps Perth homes and businesses maximise energy savings. For example, if you're not home much during the day, you're unlikely to be consuming the free energy your system is producing. By using battery storage, you can access this free energy when you are home and using power.

How do I prepare for a solar battery installation Perth?

Preparing for a solar battery installation Perth involves more than just choosing a battery--it requires space planning, technical system checks, certified installation, and understanding available financial support.
