Westsun Solar are currently completing a 1MW solar and battery storage project on the Western Power Forrestdale South Depot for Adco Constructions. Their service has been professional, and the workmanship has been to a high standard.

Why should you install a solar battery in Perth?

Installing a solar battery allows households to store surplus solar energy generated during the day for use at night or during peak times, reducing reliance on the grid and increasing overall system efficiency. For homeowners planning a solar battery installation Perth, understanding what to expect before the process begins is critical.

How do I prepare for a solar battery installation Perth?

Preparing for a solar battery installation Perth involves more than just choosing a battery--it requires space planning, technical system checks, certified installation, and understanding available financial support.

Where should a solar battery be installed in Perth?

If you're installing a solar battery in Perth, consider the following safe locations: Externally on a Wall--Preferably under a shaded, weather-protected area. Garage or Shed - Provided the space is well-ventilated and compliant with fire safety regulations.

Are solar batteries safe in Perth?

Ensuring electrical safety and legal compliance is non-negotiable when installing a solar battery. In Perth, all installations must follow: AS/NZS 5139:2019: This standard outlines battery installation safety including clearance zones, ventilation, fire resistance, and signage.
