How much does it cost to install solar panels?

The average cost to install solar panels is \$12,600 to \$37,800 for a 6 kW to 12 kW system, after subtracting the 30% federal tax credit. Residential solar panels cost \$3.00 to \$4.50 per watt, including installation. However, the cost of solar panels continues to decrease each year as solar energy becomes more popular.

How do I get a solar installation?

Fill out the online form, and a trusted independent installer will call you to schedule a consultation. The solar specialist will review suggestions for your home based on square footage, power needs and appliance wattage to ensure a whole-home solution.

Do I need a license to install solar panels?

An electrical license is an absolute requirement. An installer with the North American Board of Certified Energy Practitioners (NABCEP) Certification is also a major plus (and a requirement to be on Solar.com's platform). When you search for local installers, make sure to ask if they are NABCEP certified or check their website for the logo.

How do I choose a solar company for my home?

When beginning your home solar project, you might start by searching "Solar Providers Near Me." Then, you'll be presented with dozens of different solar companies to choose from. All of these installers will vary in size, equipment offerings, and reputability, and it can take months to line up multiple quotes. But there's a better way.
