Who is California solar installers?

California Solar Installers is an award-winning solar solutions company focusing on solar energy, battery storage, and roof installations across Southern California. We are committed to providing innovative solar energy solutions that contribute to a more sustainable future.

How do you install batteries on a solar system?

There are essentially two ways to install batteries on an existing solar system: 1) install an additional inverter (or 'all-in-one' battery product that has its own, in-built inverter) to handle the batteries separately - the two box solution.

How do I get a solar installation?

Fill out the online form, and a trusted independent installer will call you to schedule a consultation. The solar specialist will review suggestions for your home based on square footage, power needs and appliance wattage to ensure a whole-home solution.

Should I install batteries on my solar system?

If you currently receive a generous rate for the solar electricity you export to the grid under a state-mandated feed-in tariff program (nearly all of which are now closed to new applicants), it may not be worth your while to install batteries. What proportion of your electricity consumption does your existing solar system meet?

Why do I need a battery backup for my solar panels?

Energy storage, or battery backup, offers you peace of mind knowing that your home will have power when there's an outage. It's also a great way to offset energy costs during periods of surge pricing. How do I maintain my solar panels?

What is solar power & battery backup?

Capture the rays of the sun with solar panels and store that energy with battery backup. Solar power and battery backup protect you from surge pricing during peak-demand times or as a backup when the power goes out. Prices are rising every day, and electricity continues to be in high demand.

Once you receive your quote, you can schedule an installation time that's convenient for you. We'll conduct a pre-installation jobsite inspection to determine photovoltaic (PV) array and battery locations to verify there's no existing ...
