

# Solar home battery illinois

Do you need a solar battery in Illinois?

Having a solar battery can store excess solar that never expires, and can be used to power your home any time you need it. Here are some Illinois companies that install panels and solar battery storage systems: Picking a solar company is the most important decision you make when going solar.

Are solar incentives a good idea in Illinois?

Solar incentives and rebates can cut the cost of installing solar in Illinois by thousands of dollars. The most significant incentive is the 30% federal solar tax credit, available to any taxpayer in the country when they purchase solar panels or battery storage.

Are solar loans a good idea in Illinois?

Solar loans are popular among homeowners because you don't have to have the money for the installation upfront, but you get better lifetime savings than with a leased system. You also get to directly use the incentives (tax credits, rebates, etc.) available in Illinois, rather than a leasing company retaining them.

How many solar panels do you need in Illinois?

Averaging about 4.2 to 4.9 peak sun hours each day, a solar system in Illinois might need a few more panels than one in a sunnier state to completely cover electricity costs. However, the net metering policy in the Prairie State doesn't allow your excess solar credits to roll over indefinitely.

What certifications do I need to install a solar system in Illinois?

Illinois requires those who install solar systems to hold a Distributed Generation Installer Certification from the Illinois Commerce Commission. The instructions on how to obtain the certification are outlined on the Illinois Solar Energy & Storage Association website. Financing options

What is a good APR for a solar loan in Illinois?

Recent interest rate hikes have bumped solar loan APRs above 5.99%, but we have seen some providers offer as low as 30-year, 3.99% loans. Getting quotes from different installers is essential to getting the best rates possible in Illinois.
