Honda plans to launch electric models with the new all-solid-state battery tech in the "second half of the 2020s." The new demo line replicates the processes required for mass production.

Honda hopes that its solid-state batteries will be used in future EV models, with a goal of applying the technology to next-generation vehicles by the latter half of the 2020s.

Honda announced Thursday it has opened a demonstration production line for solid-state battery cells at its R& D center in Japan.

Honda's solid-state battery tech offers faster charging, longer range, and better durability, setting the stage for a major EV industry shift.

Honda is set to transform the electric vehicle (EV) landscape with its ambitious all-solid-state battery technology, marking a significant milestone in its journey towards carbon neutrality and technological innovation.

The automaker built a demonstration production line to figure out how to make affordable, high-density solid-state batteries for EVs and everything else.

Honda is set to transform the electric vehicle (EV) landscape with its ambitious all-solid-state battery technology, marking a significant milestone in its journey towards carbon ...

Honda's new facility could drive breakthroughs in solid-state batteries for electric cars, ultimately leading to batteries with more than double the range of existing EVs.

In order to realize carbon neutrality, Honda is positioning the all-solid-state battery as one of the key technologies and is working sincerely on its development with an eye toward the earliest ...

With its new demonstration line, Honda will work to refine its solid-state battery design and its manufacturing techniques

Honda has officially unveiled a demonstration production line for its all-solid-state batteries, located at its R& D facility in Sakura City, Tochigi Prefecture, Japan.
