Does Toyota have a solid-state battery?

Toyota has been researching solid-state battery technology for over a decade. In fact, it filed over 1,000 patents related to the tech, more than any other automaker or tech company. In 2020, Toyota unveiled a prototype vehicle powered by a solid-state battery.

Will Toyota build all-solid-state EV battery?

Toyota teams up with Japanese oil giant to build all-solid-state EV... Japanese automaker Toyota has teamed up with the oil giant Idemitsu Kosanto construct a large-scale lithium sulfide plant to supply raw materials for Toyota's all-solid-state EV battery production line.

When will Toyota start producing solid-state batteries?

However, actual mass production is planned for "2030 and beyond," according to a post on Toyota Times. In a recent press release published by Toyota, the manufacturer says it will begin solid-state battery production "starting from 2026" and that this will be "gradually implemented."

How many solid-state battery patents does Toyota have?

Toyota holds far more solid-state battery patents than other automakers. Over the past three years, Toyota registered over 8,000 solid-state battery patents. Many are assigned jointly with Idemitsu. Hyundai, Kia and Honda are actively researching solid-state battery innovation.

Are solid-state batteries the first time Toyota reshaped the auto industry?

However, solid-state batteries won't be the first time the company dramatically reshaped the auto industry. In the 1970s, Toyota introduced Americans to the then-radical concept of cars that were small and fuel-efficient but still nice to drive. Up until that time, "fuel efficient" and "enjoyable" were mutually exclusive categories in America.

What is a solid-state battery?

Solid-state batteries are nothing new. Solid electrolytes were created in the 1800s, and they are currently used in small electronic devices like pacemakers and medical devices. Last October, Toyota announced signing a deal with Japanese petroleum company Idemitsu Kosan to mass produce solid-state batteries.

Toyota and Idemitsu Kosan partner to build a lithium sulfide plant for all-solid-state EV batteries, boosting Japan's battery supply chain. Set for 2027-2028, this \$142M facility aims to accelerate solid-state battery production ...

Toyota aims to commercialize the technology with battery electric vehicles (BEVs) slated for release in 2027-28. The two companies lead the world in patents related to ...
