What is solar battery storage?

Solar battery storage isn't just about backup power - it's about energy independence, savings, and resilience. Here's what to keep in mind:

How do solar batteries work?

With a solar battery, that energy can be stored and drawn on when the sun goes down, and you'll only need to draw and pay for energy from the grid when your battery is depleted. To learn more about how solar batteries work, check out our section on solar battery systems. There are many ways to compare solar batteries.

Which solar batteries work best?

AC-coupled batteries like Tesla Powerwall and Enphase IQ Battery integrate with existing solar systems, while DC-coupled options work best with new installations. Energy Independence - A solar battery lets you store excess energy and use it when needed, reducing reliance on the grid.

What is a solar battery used for?

Solar Batteries Batteries can be used in many solar installations (both grid-tied and off-grid) to store DC energy generated by the solar panel collectors. Most solar batteries are deep-cycle cells, allowing them to be less susceptible to degradation as a result of regular cycling.

Does Sunrun offer a solar battery?

Availability will depend on where you live. Sunrun installs premium hardware from companies like Lunar, Tesla, and FranklinWH. The right battery can help meet your energy needs by storing excess solar energy generated by your solar panels, allowing you to power your home with solar even when the sun isn't shining.

What kind of batteries does sunwatts carry?

SunWatts carries all kinds of storage batteries including reliable flooded, deep cycle, sealed lead acid, absorbed glass mat (AGM), gelled electrolyte (GEL), Lithium Iron (LiFePo4), or Lithium Ion (Li-On) from Generac, LG Chem, Panasonic, or Tesla to power demanding backup and off-grid systems, day or night.
