

The latest news on european energy storage systems

The global energy storage market added 175.4 GWh of installed capacity in 2024, with the three major regional markets--China, the Americas, and Europe--continuing to ...

Battery storage systems achieved a total capacity of 35 GW, with many systems being installed in households and companies. This is according ...

A total of 11.9GW of energy storage across all scales and technologies was installed in Europe in 2024, bringing cumulative installations to 89GW. According to the ninth ...

The latest edition of the European Market Monitor on Energy Storage by the European Association for Storage of Energy and LCP Delta, released on 31 March, highlights ...

ees Europe - Europe's Largest and Most International Exhibition for Batteries and Energy Storage Systems Following the great success of 2025, we are looking forward to a ...

In 2023, residential energy storage remains the largest usage scenario for new energy storage installations in Europe. According to data from TrendForce, energy storage in ...

Energy storage is a key part of the low carbon energy supply system the world aspires to achieve, for cutting greenhouse gas emissions and fighting climate change.

The European Photovoltaic Industry Association predicts that the installed capacity of large scale energy storage projects will reach a new high in 2024, ...

21.9 GWh of battery energy storage systems (BESS) was installed in Europe in 2024, marking the eleventh consecutive year of record breaking-installations, and bringing ...

The EU leads in public investments in energy storage technologies and leads the world in the thermal energy storage market, for example dominating in molten salts with ...

The latest edition of the European Market Monitor on Energy Storage by LCP Delta and The European Association for Storage of Energy (EASE) highlights ...

This article delves into the latest breakthroughs in energy storage and explores how these innovations, combined with the development of next-generation fuels, are ...

The latest news on european energy storage systems

The fleet of energy storage projects in Europe, including both pumped hydro and battery energy storage systems of all sizes, is expanding ...

Greece is getting four new battery energy storage systems (BESS) amounting to 105 MWh, while Germany's Intilion will develop 65 MWh for Switzerland's Primeo Energie.

Ambitious capacity targets and diverse revenue opportunities support case for battery energy storage system (BESS) investment in key ...

Energy storage has grown exponentially in Europe in recent years - and that pace is set to continue across the continent. So, how is the ...

EMSA has today released new Guidance on the Safety of Battery Energy Storage Systems (BESS) On-board Ships. BESS installations on board ships have been increasing in number ...

The latest analysis from SolarPower Europe reveals that, in 2024, Europe installed 21.9 GWh of new battery energy storage systems (BESS), ...

Energy storage is a key part of the low carbon energy supply system the world aspires to achieve, for cutting greenhouse gas emissions and fighting climate ...

The European Market Outlook for Battery Storage 2025-2029 analyses the state of battery energy storage systems (BESS) across Europe, based on data up to 2024 and ...

The U.S. energy storage market is stronger than ever, and the cost of the most commonly used battery chemistry is trending downward each ...

A new interactive platform--the European Energy Storage Inventory --has been launched to provide near real-time insights into energy storage deployment across the EU, ...

The latest edition of the European Market Monitor on Energy Storage by LCP Delta and The European Association for Storage of Energy (EASE) highlights Europe's rapid expansion in ...

HyperStrong, a leader in energy storage system (ESS) integration and service provision, will showcase its 2024 energy storage products and solutions at booth number ...

The European Energy Storage Market Monitor (EMMES) updates the analysis of the European energy storage market (including household storage, industrial ...

On 2 July 2025, the European Commission published guidance on renewables, grid infrastructure and network

tariffs. The communication aims to accelerate ...

As Europe continues its transition to a more sustainable and resilient energy system, energy storage remains a critical enabler of renewable energy ...

Most studies of European 100% renewable energy overlook pumped-hydro energy storage (PHES), for the following, incorrect, reasons: there are few PHES sites; more ...

The study highlights the recent Clean Industrial Deal with new state aid rules and the Affordable Energy Action Plan as promising for driving ...

Europe experienced another year of record installations for battery storage, despite slower year-on-year growth, according to the ...

Interestingly, another sort of vertical integration affecting the market of system integrators is IPPs in energy storage opting to build system ...

1 · The Commission's European Energy Storage Inventory can help address this gap within Europe. Launched in March 2025, it is the first European-level tool of its kind, providing a real ...

In it, you'll find the best of our energy storage content from Energy-Storage.news Premium and PV Tech Power, as well as new articles produced for this publication, including an overview of ...
