How can we make energy storage more reasonable?

One way to approach making energy storage more reasonable is to make sure it's renewable and ethically sourced. One company working on such a solution is Tesla. They are creating batteries that use less cobalt, a material that often comes from mines in the Democratic Republic of Congo that use child labor.

What is the most efficient way to store energy?

Rest As humans, the most efficient way for us to store energy (when excess energy is consumed) is in adipose tissue (body fat). This energy source is very inefficient but it will last a long time, making it perfect to sustain our relatively low energy requirements at rest through a process called lipolysis.
