How much does a smart meter cost in Japan?

The smart meters themselves cost ~¥10,000 per unit(analog meters cost ~¥6,000) and are sourced mainly from ten Japanese manufacturers. Any electric power meter that is used for the trading of power must be certified according to the Japan Electric Meters Inspection Corporation guidelines. Current smart meters can record the following data:

How does Japan techno meter work?

Japan Techno offers smart meters that improve electricity management by providing five levels of expression and color changes to indicate electricity usage. Their system includes 48 settings to promote efficient electricity use. Looking for more accurate results? Find the right companies for free by entering your custom query!

What is Japan doing with smart meter data?

The goal is to expand and further leverage the data collected to increase grid resilience,the penetration of renewable energy,and the emergence of new services. The Japanese government is also setting up a new data system that collates and analyses the smart meter data,called the Grid Data bank.

What are the key factors affecting the smart meter industry in Japan?

In the Smart Meter industry in Japan,several key considerations are critical for anyone researching companies in this field. First,Japan's regulatory frameworkplays a significant role,as the government actively promotes energy efficiency and smart grid technologies to enhance power management.

When will Japanese power companies start deploying smart meters?

With this in mind,from April 1st,2014,Japanese power companies were required by the government to begin deploying smart meters across Japan,following the revision of the law on "efficient use of energy aiming for a stable power supply."

What is Japan's energy storage policy?

As policy, technology, and decarbonization goals converge, Japan is positioning energy storage as a critical link between its climate targets and energy reliability. Japan's energy storage policy is anchored by the Ministry of Economy, Trade and Industry (METI), which outlined its ambitions in the 6th Strategic Energy Plan, adopted in 2021.
